

Internship Program

Company Background

Syntecxhub is a forward-thinking company that bridges learning with practical experience. We provide internship projects across exciting fields like **Web Development, UI/UX Design, Frontend & Backend Development, Data Science**, and more, helping students gain real-world skills.

Our internships offer mentorship, hands-on tasks, and exposure to live projects, enabling students to enhance their knowledge, build confidence, and prepare for successful careers.

JAVA Programming

Instructions

- Share your internship status on **LinkedIn** and mention **@Syntecxhub**.
- Upload your **entire source code** to **GitHub**, creating a repository named: **Syntecxhub_Project_Name**.
- You will receive **weekly tasks** that must be completed and submitted via the **Submission Form** within the given time.
- **you are required to complete at least one project.** Completing **multiple projects** is optional but **highly encouraged**, as it **demonstrates initiative and a deeper interest in learning**.

Project - 1

ATM Simulation System

- Simulate an ATM interface with functionalities like balance check, withdrawal, and deposit.
- Implement security features such as PIN verification.
- Use classes and objects to model ATM operations.
- Emphasize on maintaining session states and transitions.

 **Example : Link 1, Link 2**

Project - 2

Student Management System

- Build a console-based system to manage student information.
- Include features like adding, viewing, updating, and deleting student records.
- Use Java classes and ArrayList or file handling for data storage.
- Implement simple input validation and menu-driven navigation.
- Display all student data in a formatted console output.

 **Example : Link 1, Link 2**

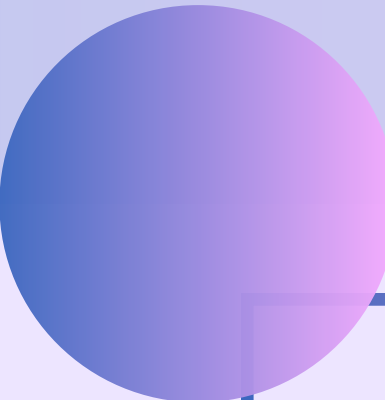

Project - 3

Inventory Billing System

- Create a billing system to manage inventory items and generate bills.
- Implement functionalities like adding items, updating stock, and generating bills.
- Use collections to manage inventory data efficiently.
- Focus on accurate calculations and user-friendly prompts.

 **Example :** **Link**

Submission Details

- 
- Each task consists of **three projects**. Every intern is **required to complete and submit at least one project** from each task.

- Completing all assigned weekly tasks is **mandatory** to successfully finish the internship. If an intern fails to complete the required projects, the internship will be considered **incomplete**, and the **certificate will not be issued**.

- Please ensure that all completed projects are submitted through the official **Submission Form** to confirm your **successful participation in the internship program**.

Thank You.
